

Incident Status Summary (ICS-209)

1: Date 06/28/2011	2: Time 1838	3: Initial Update Final XX	4: Incident Number NC-NCS-11-071-048	5: Incident Name Juniper Road		
6: Incident Kind Wildfire (Full Suppression/Perimeter Control)		7: Start Date Time 06/19/2011 1533	8: Cause Lightning	9: Incident Commander Reid Hildreth	10: Incident Command Organization Type 2 Team	11: State-Unit NC-NCS
12: County Pender	13: Latitude and Longitude Lat: 34° 32' 40" Long: 77° 40' 23" Ownership: NC-NCS		14: Short Location Description (in reference to nearest town): 18 miles northeast of Wilmington, NC			
15: Size/Area Involved 30,593 ACRES	16: % Contained or MMA 30 Percent	17: Expected Containment Date:	18: Line to Build	19: Estimated Costs to Date \$1,235,749	20: Declared Controlled Date: Time:	
21: Injuries this Reporting Period: 0	22: Injuries to Date: 0	23: Fatalities 0	24: Structure Information			
			Type of Structure	# Threatened	# Damaged	# Destroyed
25: Threat to Human Life/Safety: Evacuation(s) in progress ---- No evacuation(s) imminent -- Potential future threat ----- XX No likely threat -----			Residence	2,100	0	0
			Commercial Property			
			Outbuilding/Other			
26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames: 12 hours: Movement to the north and northeast is possible, backing fire to the south and southwest is possible due to uncontained perimeter, heavy fuels, and no barriers. 24 hours: With wind predicted, movement to the south and southwest. 48 hours: Same 72 hours: Same						
27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames: 12 hours: Holly Shelter Gameland wildlife habitat, residences along Highway 50 in Onslow County, timber and Threatened and endangered plant species, Camp LeJeune training areas and ranges 24 hours: Residences along Highway 17 48 hours: 72 hours:						
28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: 24 hours: 48 hours: 72 hours:						
29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Fuel has an extremely high organic matter component which limits moisture absorption and hinders the ability to put out the fire in this fuel type. Heavy smoke has mixed with other fires, including Pains Bay, Simmons Road and fires in Florida, impairing the air quality of areas along the coast.						
30: Observed Weather for Current Operational Period Peak Gusts (mph): 6g-15 Max.			31: Fuels/Materials Involved: 4 Chaparral (6 Feet) Pocosin fuels. Also fuel model 7-Southern Rough			

Temperature: 91 Wind Direction: S-SE Min. Relative Humidity: 56	
--	--

32: Today's observed fire behavior (leave blank for non-fire events):
Active fire spread during burnout operations. Single and group tree torching. Smoldering ground fire in the interior.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Burnout completed in southwest portion of fire, Divisions F, G, and H. Completed all contingency lines in Division M. Secured the south end of Division N where burnout occurred yesterday. Released Camp LeJeune Marine Corp resources end of shift.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 6-10 Temperature: 86 Wind Direction: N Relative Humidity: 48	35: Estimated Control Date and Time:	36: Projected Final Size: unk	37: Estimated Final Cost:
--	--------------------------------------	--------------------------------------	---------------------------

38: Actions planned for next operational period:
Secure and patrol burnout perimeter. Monitor and patrol Division K. Continue direct and indirect strategies in Divisions M and O.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:

Very active fire with convection column during afternoon burnout operation. Large acreage increase due to this approximate 8000 acre burnout.

43: Committed Resources (Supplemental Committed Resources follow the first block)

Agency	CRW1		CRW2		HEL1	HEL2	HEL3	ENGS		DOZR		WTDR	OVHD	Camp Crews	Total Personnel
	SR	ST	SR	ST	SR	SR	SR	SR	ST	SR	ST	SR	SR		
PRI					1		1						11		11
